Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. George Letcher

Subject: Protect Internet freedom! It's good for both rich and poor.

Dear Commissioner Wheeler,

The most fundamental aspects of our society (like the rule of law) depend on the masses maintaining hope for a better future. Net neutrality is a big part of providing equal opportunities to innovative startups who can't afford to bribe the big internet service providers. Please do the right thing here and preserve some aspect of fairness so our society doesn't break down even further. In the end, fairness benefits both rich and poor. Fairness gives hope and opportunity to the poor and provides a more stable society for the rich.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

Open Internet for ALL !!! - Open Internet for ALL !!! - Open Internet
for ALL !!!

The Internet is our 21st century public square. We use it to inform
ourselves about candidates, debate the issues, and organize with other
advocates. The Internet's role as a vibrant platform for public
discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm
all of us. Corporate voices will always be able to afford special
access while independent and non-profit voices suffer. The FCC must
reject any plan that would allow corporate gatekeepers to control web
traffic and recommit to the Open Internet by reclassifying broadband as
a utility.

P L E A S E : Open Internet for ALL !!!

Sincerely,
Mr. Richard Boyer

Mrs. Bobbie Schneider

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Chris Qualizza

Mr. John Alhadi

Subject: Please Protect Internet freedom!

Dear Commissioner Wheeler,

Hello,

Please do not stop American ingenuity, which is what will happen if net neutrality is destroyed.

Do not allow telecoms to decide any aspect of internet access. This is a public utility which should not be throttled. Please do not allow fast lane and slow lanes.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

I am not very tech savvy. No FaceBook. No LinkedIn. No Tweets. No iPhone.

But I use the Internet every day. It is our 21st century public square.

We Americans use it to inform ourselves about candidates, debate the issues, and organize with other advocates. We use it to stay in touch with our families and friends.

Political campaigns would be nowhere without it.

The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the monied few will harm us all.

We the People built the Internet with our taxes. We the People deserve to keep using it just as we use our roads and bridges.

Letting the Exxons and Monsantos of the world have the only good service will effectively shut down civil society.

Even the fastest U.S. Internet service is poor already in comparison with that of most other developed countries. We can thank lobbying by Comcast, et al., for that.

Yet allowing corporate voices special access while independent and non-profit voices suffer will make things even worse for most of us.

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Sarah McKee

The FCC does not exist to protect the interests of the powerful few against the disenfranchised many, but just the reverse. There would be no need for such government institutions if the only standard were "might makes right". We need an FCC that will do its job: to speak out for the interests of the average American!

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. William Mitchell

Mrs. Barbara Branham

Any action used to give more power to corporations to differentially price the Internet more than they already do will act as a force against progress and growth. It will place the forces against progress in the hands of monopolies and cartels and the results will not be pretty.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

Since phones are beginning to be a thing of the past, I am totally dependent on the internet. Even to make a 411 call to find out how to contact someone costs a disgusting \$2.49/call. As I am living on a small fixed income, the internet is the only access I have to information and for reaching my congress person.

The FCC has let us down, sold us out, and should never have considered a two lane system, which can also be used to curb our freedom of speech. The internet is like water, a right for everyone to share equally. Do you want to pay for the water you drink or the air you breathe? You're taking us one step closer if you divide the net between the "have-a-lots" and the "have-a littles."

The consequences for free trade and the economy in general could be disastrous. You are also a part of those who would be affected.

Do the right thing. Don't divide the internet.

Sincerely,
Pelle Lowe

There is an Internet slow land already as I experience it. During the day when folks are home and Holidays often there is an onrush of users and access to internet sites is slowed. Broadband is not as broad a band as it should be because providers of the transmission do not upgrade network like it is done in other nations. That money that is used by other nations to upgrade broadband is kept in the pockets here for profit increase for shareholders and CEO's.

My suggestion is to treat internet providers as common carriers. We could also do a lot more to bring our internet speeds up to a civilized level for everyone like other advanced economies. We're way behind on this front and we invented the internet!

Sincerely,

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

We have an issue of a public, open to all on an equal basis, capability potentially being controlled by a few for their private benefit. This is a downward spiral to control of the many by the few. This is not free enterprise but a controlling grab for profits.

Sincerely,
Dr. Elliot Framer

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

I live out in the boonies and depend on an open internet. I enjoy dealing with small companies. I am a patient person, but even i would under some circumstances not have the time to wait for transactions to be made by companies who could not afford to pay for faster service, so those small companies would soon fold. It disgusts me that large companies have so much control over what happens in the US these days. I urge the FCC to do the right thing and not bend to monied interests.

Sincerely,
Mrs. June Rosenberg

Dear Commissioner Wheeler,

The Internet has become an essential foundation for the future of the U.S. economy, scientific advancement, public discourse and democratic government. Any regulatory move to provide privileged access to big business and wealthy elites necessarily comes not only at the expense of small business and entrepreneurship, the poor and middle classes, but at the expense of our economy, science, and democracy as well.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Please do not change the existing rules to comply with the greedy ambitions of the wealthy few -- don't sell the rest of us out!

Dear Commissioner Wheeler,

Oh great, just like Facebook, screening what shows up or more often, what doesn't. That's a horrible idea!! the 'Net needs to be neutral to all content, not just what Comcast, AT&T, etc. want you to see. And why is a governmental agency favoring one segment. I'm sick and tired of everyone catering to the rich in lieu of treating all users the same. Please reconsider this preferential treatment of a few over the many. I already pay my internet provider, now I have to pony up more? Are you kidding me?

DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Gail Linnerson

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Lois Keim

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ross Eliason

Dear Commissioner Wheeler,

That anyone would even consider selling access to the internet to the highest bidder is appalling. It is "Citizens United" all over again, essentially offering our democracy to those who have already profited enormously from our society's strengths. It is vital to preserve net neutrality to assure a level playing field, for private discourse, for political efforts, for commerce, and for the arts.

Sincerely,

The United States, the developer of the Internet, already has one of the slowest internet speeds of the developed world: behind South Korea and Europe. In the technological age it is unacceptable that these some companies that have no incentive to improve our internet speeds would suggest that they need to introduce a tiered system to slow it down further.

Thank You for your attention to this matter.

Sincerely,
Mr. Raymond Pelling

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Ruth Osburn

Dear Commissioner Wheeler,

I hope you listen to reason. The consequences to most of Americans who use or will use the Internet in the future are serious. We have enough advertising and misdirecting without being obliged to pay. If the USA does this other countries will jump into it and it will be slow for all. The end of democracy and growth.
Jackie Dempere

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Dr. Millard Hall

There are a number of reasons why this is incredibly important. I work for a non-profit organization and I use the internet daily. We are looking at VOIP as a phone solution. A major portion of my daily work would be hindered by the rules proposed by these companies.

We are not fiber-optic enabled at home, nor at work. This was promised. It was supposed to be accomplished by 2002. We have already paid these companies, in the form of huge tax breaks, for something they still haven't delivered. Do not let the rape taxpayers again, please.

Petition Mailbox
DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

America's relationship with our corporations is very similar to partners in a domestic violence scenario: corporations continue to bash us over the head for tax breaks, their rights as "people" in the political process (they don't get to vote, because they're not people, but they do get to have as loud a voice as they want in the elections); they are not responsible for most of the scientific advancement America has thrived on for the past century or more, but they get to make indecent profits off of it while avoiding their fair share of taxes.

The internet is a perfect example: its development was wholly due to a grant for doing science from the US government. The argument for a "fast lane" is that corporations have invested money in the internet, and therefore they should get rewarded - by getting benefits we, the funders of the research and much of the infrastructure that supports it, won't get.

Corporate interests coopt everything the government does (its called privatization) to our detriment. The internet (at least in the US) is ours, the people of the United States, we paid for its invention, we paid or subsidized its expansion. It is a fundamental part of our infrastructure, and a country's infrastructure is NOT something for which we should be maximizing the profit on for any entity, government included.

Sincerely,
Mr. Richard Billington

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Robert Ziegler

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Brian Clifton

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

I work in a business that uses the internet extensively, and, where we along with a lot of other single state insurance rating outfits compete very well with larger multistate competition.

For us, local knowledge, accuracy personal relationships are the key to our competitiveness. But, if we were to be relegated to the "slow lane", I'm doubt we would be viable any longer.

Furthermore, as a person that works in this business, I don't see that other than banning the tiered processes completely, could be effectively policed against collusion, political adventurism and downright extortion. Enabling a tier process gives the ISP a reason to trace and identify users which by itself is oppressive.

Creating a tier process will lead to development of hardware that will enable discrimination of all kinds. The speed at internet transactions occur will make it difficult if not impossible to enforce contracts never mind the law.

The only way to ensure the equal public universal access is to require net neutrality and to ban all hardware and software that facilitate packet discrimination.

The internet was created by the public, for the public. Nobody has the right to take it away and give it over to private corporations.

Sincerely,
Mr. Robert Mauser

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Dan Sauer

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
JOSHUA CRUNK
